Women's college students report higher levels of active learning, faculty interaction, and class participation

Businessweek's "Rising Women in Corporate America" are women's college graduates

Women's college students are more likely to collaborate in faculty-led research or work in political campaigns

Women's college graduates have more successful careers and find more satisfaction in their work

20% of women in Congress are graduates of women's colleges or universities

women's college students are twice as likely to complete a graduate degree

A photograph of two young women in a computer lab. One woman, with dark skin and curly hair, is pointing at a computer monitor. The other woman, with light skin and long dark hair, is looking at the screen with a smile. The monitor displays a social media-style interface. In the background, other students are seated at desks with computers. The room has large windows and bookshelves.
